DETAILED ACTION

A request for continued examination under 37 C.F.R. 1.114, including the fee set forth in 37 C.F.R. 1.17(c), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 C.F.R. 1.114, and the fee set forth in 37 C.F.R. 1.17(c) has been timely paid, the finality of the previous Office Action has been withdrawn pursuant to 37 C.F.R. 1.114. Applicant's payment and submission filed 11/5/2008 has been received and entered into the present application. Accordingly, prosecution has been reopened.

Claims 1-17 and 19-27 remain pending. Accordingly, claims 1-16 and 22-27 remain withdrawn, claim 18 has been cancelled and claims 17 and 20-21 are currently amended.

Applicant's arguments, filed 11/5/2008 have been fully considered. Rejections not reiterated from previous Office Actions are hereby withdrawn. The following rejections and objections are either reiterated or newly applied. They constitute the complete set of rejections and objections presently being applied to the instant application.

Claims 17 and 19-21 are currently under examination and the subject of this Office Action.

Objection

Claims 19-21 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The "complexed to..." limitation in claims 19-21 fail to further limit the composition of claim 17 due to the limited R moiety options in claim 17. Thus, claims 19-21 may be interpreted as being outside of the scope of instant claim 17.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 17 is rejected under 35 U.S.C. 102(a) as being anticipated by Allen et al (J. Biol. Inorg. Chem, 2003, 8: 746-750).

Allen et al teach the compound (page 748):

Conclusion

No claim is found to be allowable.
